

Garment Care

Hinchman garments of NOMEX can be cleaned by home or commercial laundry or by dry cleaning procedures without loss of their outstanding protective features. The following suggestions will help you keep your garments looking neat and attractive.

Laundering

- You can Pre-treat greasy stains and collar/cuff lines with a product such as ***Spray 'N Wash or Shout***, but **DO NOT SOAK**.
- Launder garments of NOMEX only with other garments of NOMEX such as Nomex underwear, balaclava (headsock) or socks.
- Do not overload home laundry equipment. Wash garments in cold or warm water with a mild detergent such as ***Era, Tide, Cheer, Woolite***, etc. (**DO NOT USE BLEACH**).
- For maximum fire protection, greases and oils should be thoroughly removed from garments of NOMEX after each wearing. If home procedures do not accomplish this, we recommend you try a commercial laundry or dry cleaner. The care label inside Hinchman's suits recommends washing. If you don't tell the commercial dry cleaner that you definitely want it dry cleaned, they will follow the care label.

Always fasten Velcro (collar and belt) to prevent fraying of the suit.

BEWARE!!! DO NOT EXPOSE THE SUIT TO THE SUN OR MOON LIGHT. NOMEX IS NOT ULTRAVIOLET RAY RESISTANT. COLOR FADING WILL OCCUR.

Drying

- Tumble dry garments at lowest temperature setting (Fluff Dry) ***or*** let hang to air dry in the shower or bathtub. **DO NOT** hang NOMEX garments in the sun.
- We don't recommend washer and dryer added softener/ anti-statics. They will often reduce the ability to wick perspiration from you.
